

# What is the Atmospheric Water Generator (POTORI) ?

Why water from air?

→ Approximately 2 billion people around the world lack access to safe drinking water.

POTORI is a new option that delivers the "freedom to obtain water without relying on infrastructure."

AWG POTORI

## Three Core Benefits

1

Water for a New Era [High-Quality Infrastructure]

No piping work is required. This decentralized water infrastructure can quickly supply safe water even in times of disaster or in areas without infrastructure, as long as there is a power source.

2

Climate change measures and cost reduction  
[Climate change measures]

Significantly reduces CO2 emissions associated with water transportation and plastic waste from plastic bottles. Solves both environmental impact and economic costs.

3

To improve health and hygiene [Health and hygiene improvement]

Our unique filter thoroughly removes contaminants and viruses, providing safe drinking water that everyone, from infants to adults, can drink with peace of mind, improving public health.

### Disasters and emergencies

Secure drinking water on the spot to save your family's lives

### Areas with underdeveloped infrastructure

Providing much-needed safe water for communities

### Offices and public facilities

It can replace a water server and reduce costs

### Remote islands and mountainous areas

Providing a stable water supply even in places where transportation is difficult

The atmospheric water generator is not just a device that produces water from the air, but a solution for a sustainable future that gives us the freedom to drink water safely, anytime, anywhere.
